GET /api/v1/Prices/ByWebshopCode/{WebshopCode}/Delta	Get prices by last changed date for a specific webshop by last changed date.

### Extended methods

Method	Description
GET /api/v1/Inventory	Optional parameter <code>LastChangedDate</code> is added to support Delta updates.
POST /api/v1/Order	A validator is added to prevent unnecessary discountlines with 'zero' discount.
GET /api/v1/ProductProperties	Optional parameter <code>WebshopCode</code> is added. Get product properties for specific webshop.

Method	Description
GET /api/v1/Settings/{GroupName}	GroupName is new and creates the option to return all setting and values for a group.
GET /api/v1/Catalog	"Name2"

### Changed methods

Method	Description
POST /api/v1/Order	"HouseNo" is made optional for CountryCodes other than "NL".
POST /api/v1/Order	The validator for "HouseNo" and "HouseNoExt" has increased length (10 > 20 chars).

### Moved endpoints

None.

## Omnichannel Integration Suite API's

- [General] < As mentioned above.
- Authentication < Do your Auth0 authentication via OIS. Will take care of caching the Bearer tokens.
- Bulk < API to synchronize Divide.OIS with your ERP.
- Circulation < API for our Retail Suite Circulation Application.
- Product Complaint < API for our Retail Suite Product Complaint Application.
